Systems-focused and analytical Informatics Engineering graduate with hands-on experience developing digital solutions across government, manufacturing, and MSME sectors. Experienced in backend development and data processing, building APIs and scalable systems for real-world applications. Proven contribution to production-level features and system reliability in practical use cases.

EDUCATION

Universitas Pembangunan Nasional "Veteran" Jawa Timur

August 2021 - June 2025

Bachelor of Informatics, Faculty of Computer Science | **GPA: 3.85 / 4.00** [[Transcript](#)]

WORKING EXPERIENCE

Dinas Komunikasi dan Informatika

July 2026 – Present

Full Stack Developer/Expert Staff

- Led the end-to-end development of Manunggal Raharja v2, from technical planning and architecture design to SDLC implementation, while transforming a 3,000+ LOC legacy Vue frontend into a modular, composable-based architecture that improved maintainability and development efficiency.

LPPM UPN Veteran Jawa Timur

May 2025 – January 2026

Lecturer Assistant & Product Developer

- Collaborated with Eva Yulia Puspaningrum, M.Kom. on an LPPM-funded project to architect a Flutter-based mobile platform for Titik Batik, successfully transitioning their manual, local-only sales model into a digital-first commerce system that achieved a 100% Acceptability Rating via the System Usability Scale.

PT Molca Teknologi Nusantara

July – October 2025

Full Stack Developer

- Resolved critical frontend-backend synchronization issues in Speeds Calary Indonesia's e-commerce platform, stabilizing checkout accuracy and contributing to an app rating increase from 2.6 to 3.6 within 2 months.
- Engineered REST APIs for the H7 Ajinomoto OEE digitalization project, converting raw sensor, HMI, and digital twin data into structured production events with near real-time processing (<10s latency), ensuring accurate downtime mapping in the backoffice timeline.

PT Bimbingan Belajar Himalaya

January - March 2026

UI/UX Designer & Web Developer (Freelance)

- Redesigned UI/UX (v2.0) for "Jadi Juara" learning app and built Bimbel Himalaya's company profile website, featuring a 9-step SNBP admission probability calculator built as a 5-form wizard that processes report cards, achievements, and school data through a weighted formula with accreditation and alumni-history correction factors.

PT Bimbingan Belajar Himalaya

August 2024 - March 2025

UI/UX Designer & Mobile Developer (Freelance)

- Owned the end-to-end UI/UX design process from wireframes and user flows to high-fidelity prototypes and final UI, featuring implemented an offline-first mobile learning app "Jadi Juara", ensuring stable access during network interruptions for 1200+ active students.

Ministry of Finance of the Republic of Indonesia (Kemenkeu)

February – July 2024

Full Stack Developer (Intern)

- Re-engineered the KPPN Khusus Investasi dashboard on the DIGIT SSO platform to monitor Rp261.53 Trillion in government investments and Rp2.84 Trillion in state revenue, integrating real-time financial metrics such as IKPA (96.81/100) and receivables to enhance data-driven decision-making for high-level stakeholders.
- Developed system modules for U-FinE (UMKM Financing Empowerment) to support KUR access tracking and UMKM assistance program monitoring under the Directorate General of Treasury.

SECURITY RESEARCH

Independent Security Researcher

July 2026

- Discovered and responsibly disclosed two critical vulnerability chains on Jombang Regency Government

systems, achieving CVSS v3.1 scores of 9.8 and 9.1 (CRITICAL), collectively impacting 252,315+ citizen PII records across multiple vulnerability classes including source code exposure, SQL injection, broken access control, and credential exposure. Coordinated responsible disclosure with CSIRT Kabupaten Jombang and BSSN. [[Certificate](#)]

PRODUCT & ENGINEERING PROJECTS

Offline-First Android Application for Waste Detection Using YOLO & CRDT

November 2024

- Built an offline-first Android application using SQLite and CRDT-based synchronization, maintaining 95% functionality during network failures, and integrating YOLO-based image detection to classify non-degradable waste, improving inspection efficiency and reducing manual reporting errors. [[Journal](#)]

TRAINING AND CERTIFICATION

- Junior Web Programmer - [BNSP](#) (Issued Date: 2025 | Valid: Okt 2028)
- Fullstack Developer - Dicoding Indonesia (August – December 2023)
Completed Full Stack Developer program covering JavaScript, AWS Cloud fundamentals, CI/CD, and microservices architecture. [[Transcript](#)]

TOOLS AND SKILLS

- Programming Language : JavaScript, TypeScript, Go, Java, PHP, C++, Python.
- Software Development Tools : JavaScript Framework (Nuxt.js, Vue.js, Next.js), Laravel, Flutter, Kotlin, Go Fiber, TS Hono, Express, SQL, NoSQL, Docker, Github Actions, Kubernetes, K6, Sentry.
- Cybersecurity Tools : Kali linux, Burp Suite, subfinder, sqlmap, OSINT Techniques.
- Operating System : Ubuntu, Kali Linux.
- Design Tools : Figma, Adobe Illustrator, Adobe Photoshop.
- Collaboration Tools : Zoom, [Github](#), Gitlab, Google Space, Jira, Clickup.
- Product & Project Skills : End to end SDLC involvement, feature planning and delivery coordination, troubleshooting and production issue handling.
- Languages : Indonesian (Fluent), English (Professional)
